

Just a key please!

The Enzosystems Key Dispenser is developed to make the check-in process super-fast and with a minimum of touches. Guests that have received a barcode in their e-mail or hotel app, can use them to let the machine create and dispense their room key.

The barcode scanner reads and decodes all standard 1D and 2D codes. It can read these codes both from smartphones as well as paper in a split second.

Safe check-in

Adding the Enzosystems Key Dispenser to your lobby helps to make the check-in process safer in two ways:

First, sanitized key cards are stored away safely inside the machine without anybody who can touch them, and second, it drastically reduces the time people have to be in the lobby waiting to check-in.

Dimensions: 300 x 480 x 380 (width x height x depth)
Weight: 15 kg
Power: 24V (external power adapter included)

Specifications:
Decoding: All standard 1D and 2D barcodes including EAN and QR-Code
Media: Reads from smart phones and paper
Capacity: 200 keys
