

Compact Hotel Kiosk

Fast check-in at an affordable price

The Compact Hotel Kiosk is a revolutionary low-cost check-in solution suitable for every hotel. No substantial investment is required to start offering your guests the best and most reliable check-in experience.

With a user-friendly interface, guests can check-in between 30 seconds and two minutes and check-out in less than 15 seconds. Guests can manage their details, add extras, upgrade their room, create room keys, and complete payments. All done independently and without assistance.

Smarter & simpler

Simple and compact kiosk hardware that is easy to install, use, and maintain and a new web-based kiosk software are the main attributes that make this kiosk our most compact and future-proof kiosk ever.

By using the integrated scanner, the kiosk can be used for a fast check-in when used with a pre-check-in service. The guest only needs to scan their confirmation QR-code to gain access to their room.

New hotel kiosk software

Our brand new kiosk software is fast, responsive, flexible to configure, and enables real-time monitoring of the Compact Hotel Kiosk from any web browser.

The cloud-based software works with the most common property management systems, door lock platforms, and payment service providers.

The email notification service provides guests with digital receipts and room slips, eliminating the need to print on paper.
